

BACKGROUND

The Crown Street Mall (Mall) is a unique space located within a retail and business environment located at the heart of our Wollongong City Centre.

A city mall speaks volumes about a city, how it is perceived, how it is used and importantly what is experienced and shared with other people. Flexible spaces and a diversity of functions both day and night allow people of all ages to spend time in the Mall creating a constant hive of activity.

Council welcomes and encourages the type of activity identified in this Policy that delivers on the Guiding Principles identified below:

OBJECTIVE

The main objectives of this Policy are to:

- 1 Provide a clear and transparent framework to guide the decision-making and approval process for activity in the Mall; and
- 2 Encourage various forms of activity that create a vibrant and revitalised Mall and a strong sense of place for the community and other stakeholders.

POLICY STATEMENT

This Policy provides a framework for appropriate Mall activities while acknowledging that in a mixed use environment, these activities need to be carefully managed for equity and fairness to all and to protect and recognise the role of the city's public domain.

For the purposes of this Policy the Mall is the area that encapsulates Crown Street between Keira and Kembla Streets, a section of upper and lower Church Streets and Globe Lane – see Figure 1 below:

Figure 1

This Policy is to be implemented in conjunction with other relevant Council policies and strategies including the Wollongong Local Environmental Plan (LEP).

STATEMENT OF PROCEDURES

GUIDING PRINCIPLES

The following describes the five guiding principles which support activity in the Crown Street Mall:

1 Appropriate Location

Council seeks to encourage Mall activity in appropriate locations in order to promote economic growth, cultural benefits and social integration while understanding the needs of local businesses and users of the public domain. The location should be selected based on where the activity can enhance the vibrancy and positive experience.

Activities should be integrated into the Mall in a way that do not disrupt the community's engagement with the public domain i.e. compromise existing users, pedestrian access, street furniture, and building entrances.

While the whole of the Mall provides activation opportunities, three zones have been identified as major activation hubs with a capacity to support a number of different forms of activity occurring in tandem. These locations are the Kiera Street Mall Entry/Exit, the T-intersection at Church Street and the area opposite the Wesley Church – see Figure 1.

Specific sites have been allocated for fundraising and street entertainment.

2 Safety and Accessibility

Mall activities should be delivered without compromising the safety of people or places. With safety in mind well-designed and maintained equipment, stalls and infrastructure are essential.

Accessible paths of travel located within the Mall against the perimeter of the public domain and private property lines are to always be kept clear. This aligns to Council's commitment for accessibility and inclusiveness for all people including those with a disability.

3 Authentic, Diverse and Engaging

Council encourages new and interesting ideas that add to the life of the City Centre, give another reason for people to visit the City Centre, enhance the vitality of the Mall, and create a sense of interest and curiosity. The range of Mall activities should reflect a uniqueness, depth and breadth of creative opportunities and may be seasonally orientated.

Activities within the Mall should be authentic with a strong 'local' focus. 'Local' refers to creatives and products designed by residents within the Wollongong LGA, surrounding LGAs or the Illawarra Region (can be manufactured elsewhere).

The originality of Crown Street Mall activity concepts should be demonstrated with a strong point of difference that complements the current retail offer.

Mall activities should be engaging and diverse in nature encouraging community participation.

4 Attractive and High Quality

The design and appearance of structures should be innovative and vibrant, as well as being structurally sound to be able to withstand exposure to various climatic conditions. The overall design of any infrastructure used by the activity should contribute to the Mall's physical characteristics and enrich the street culture.

The activity must be considered to be suitable and acceptable for presentation in the public domain.

5 Management and Operations

Council encourages Mall activities that demonstrate sound management practices such as timeliness, reliability and professionalism. Any proposed activity should consider basic logistical matters such as safety, traffic, noise, waste and access before, during, and after each activity. Evidence of how this is addressed will be required and will be used to address suitability.

Demonstration of how the activity delivers on the Mall alcohol and smoke-free zone will also need to be clearly defined.

Mall Activity applications should provide evidence of current public liability insurance with a minimum cover of \$20,000,000. Council reserves the right to waive this requirement when appropriate.

TYPES OF ACTIVITIES

This Policy extends to the most commonly practiced forms of activation. These include activities that occupy any part of the public domain for of a long term, medium term and short term.

Each of the activities identified in this Policy has specific requirements which are identified in each of the attached corresponding Policy Operating Statements attached to this Policy.

Seasonal activities are temporary in nature, may occur on a daily and/or weekly basis and may be disassembled and removed from the public space at the end of the day.

Seasonal activity is any activity that offers the sale of unique products or services or the presentation of unique displays eg art installation.

The location and total area for this activity will be determined by Council taking into consideration pedestrian volumes and existing retail offer. All infrastructure and trading is required to stay within that area during the allocated period.

2 Safety and Accessibility

Mall activities should be delivered without compromising the safety of people or places. With safety in mind well-designed and maintained equipment, stalls and infrastructure are essential. Responsible and appropriate measures are to be put in place to minimise risk and danger.

Accessible paths of travel located within the Mall against the perimeter of the public domain and private property lines are to always be kept clear. This aligns to Council's commitment for accessibility and inclusiveness for all people including those with a disability.

3 Authentic, Diverse and Engaging

Council supports original and creative activity that adds vibrancy to the Mall. Retail trading and seasonal events should provide a sense of interest and curiosity, be authentic and engage with the surrounding domain and people.

Businesses located within the Wollongong Mall rate geographical area will be offered first preference. Applications from other businesses will be given consideration where it can be demonstrated that the proposed offer delivers a point of difference and contributes to the Mall's street culture.

4 Attractive and High Quality

The design and appearance of structures should be innovative and vibrant, and structurally sound to be able to withstand exposure to various climatic conditions. The overall design of any infrastructure used by the activity should contribute to the Mall's physical characteristics and enrich city life and street culture.

The activity must be considered to be suitable and acceptable for presentation in the public domain. Council reserves the right to withhold the issue of a permit where the activity is likely to detract from promoting the concept of the Crown Street Mall as a pleasant community and shopping precinct.

Council reserves the right to prohibit the use of microphones and amplified sound within the Crown Street Mall.

5 Management and Operations

Council will approve retail trading and seasonal events that are well organised and demonstrate good management practices such as timeliness, reliability and professionalism.

Any proposed activity should consider operational matters such as, but not limited to, safety, noise, waste, cleaning and access before, during and after each activity. Evidence of how these factors will be suitably addressed is required. A risk management plan will also be required.

Implementation of the Mall alcohol and smoke free zone will also need to be demonstrated.
